

ABSTRACT OF THE DISCLOSURE

5 A video gaming system provides a game of video draw poker or a variation thereof in which a player may withdraw exactly 40% or exactly 60% of any wager on any hand (surrendering 60% or 40% of the initial wager, respectively). The game may end upon the surrender, or the odds within the pay table may change with continued play of the game with the residual of the wager. In another variant, the player may withdraw a percentage of the original wager, have the initial pay table altered, and the game is allowed to continue.
